solutions

Protecting those who help others

Your business is about making lives better – ours is about protecting you whilst you do that!

Businesses in the Healthcare and Medical Technology sector operate in a complex working and legislative environment which can carry enormous risks.

We will help you understand those risks and create a clear and cost effective solution that properly protects your business and your employees.

We've spent many years building long term relationships and a detailed knowledge of our clients' businesses which enable us to provide them with the right help and advice. We want to be trusted advisors to the trusted advisors.

Who can we help?

We're glad to work with businesses at all stages of their development from start-up to global plc's. Our clients come from a wide range of specialisms and include:

- Medical Device & Consumable manufacturers
- Clinical Trials in the UK and Globally

- Clinical Research Organisations
- Medical Technology developers
- Private Hospitals
- Biotech
- Pharmaceutical manufacturers

How can we help?

Our aim is simple, we want to simplify the complex insurance solutions that exist and help you create the most practical and cost effective solution for your business.

When claims occur, we will be there to provide support and guidance to ensure your interests and reputation are properly protected.

We can help you understand and place cover for:

- Medical Malpractice
- Clinical Trials
- Product Liability
- Professional Indemnity
- Intellectual Property
- Research and Development
- Product Recall

These classes of insurance are particularly relevant for businesses operating in the Healthcare and Medical Technology sectors.

Attracting and Retaining Talent

We know that you rely on the skills and passion of your team to deliver your business goals. We can help you create a flexible and compelling Employee Benefits package that will not only help you comply with your statutory responsibilities but will also help you Recruit, Reward and Retain the talent in your business.

If you would like to hear more about how our approach could help your business, please contact our specialist team:

Ian McKinney
